Tutorials exist to teach us! :-)

To be honest:

* This app was created by me using a tutorials, so this is not my 100% skill, what means I am not an author.
* I know how it is made & how it works, can explain everything „ what where, what from where and why".

- Some simple functionals is made by me, also using tutorials or stackoverflow.

Tutorials exist to teach us! :-)

HOW TO USE:

1. Donwload this repository with webpack-config file.
2. Use command in command line: npm i
3. or/next: npm run server
4. open in browser: localhost:3001
5. Sometimes has to open code editor and do anything – space, or enter - and save, to webpack can notifies changes and render app correctly.
